

## Facials

The vast majority of skin irritations are caused by bacteria or fungi on the skin. It is therefore important to choose a skin care product that is not only active and gentle on the skin, but also strong enough to protect against impurities, dry skin and other everyday problem skin caused by the harsh environment.

Australian Bodycare's skincare range is based on the totally natural and unique skin-friendly essential oil Tea Tree (*Melaleuca alternifolia*). Tea Tree Oil is a natural antiseptic, bactericide, fungicide.

Contrary to most other antiseptic preparations, Tea Tree Oil is effective on many acute and prolonged problem skins and can be used daily, without causing an imbalance in the natural bacterial flora on the skin. Australian Body Care products provide optimum hygiene in your daily skin care, strengthening the natural defence of the skin against problems.

Australian Body Care products are hypoallergenic.
